Hello World!

With over 30 years' experience, Trimtex can safely say they know orienteering clothes! But in order to keep up and improve, we need to keep on developing our clothes.

By running, testing and talking to orienteers, and by having a close working relationship with the biggest stars within orienteering, we are able to keep ahead. A world class champion sets high standards and we are able to offer everyone the opportunity of using the same fabric and models. We talk to the best from other endurance sports and receive feedback from out in the field. We can offer you the clothes to reach the top, but the training you still have to do yourself...

With laser printing, we can now create stunning designs to your track suits and competition wear by adding logos, your club name, pictures and more. We constantly strive to strengthen your profile with "cool" products, which strengthens team unity. This summer, why not make a sprint suit or how about

a softshell jacket, which is perfect for training in the autumn/winter season. Nothing is impossible at Trimtex, which is why it is important to look ahead. Perhaps now is the perfect time to change the design of your clothes?

In the spring of 2010, we will be able to offer a new concept on our website - www.trimtex.no. It's called "GoDesign" - here you can make your own designs and send them to us. This may inspire internal competitions in the club on who can design the best shirt!

We do our utmost to develop products that are comfortable to run in. The best clothes are the ones you use for everyday training, that you feel comfortable in and that you rely on when the weather isn't perfect. We are proud that so many national teams as well as small and large clubs choose our products.

I hope to participate in many great orienteering races and will be cheering for Norway (and Sweden!) during the World Championships in Trondheim this summer!

During the spring, I hope to have a chat with the whole of Orienteering Norway. If you don't hear from me, then please don't hesitate to call me or send me an e-mail. Or better still, stop by Trimtex in Lillesand!

Isak Bergman

Marketing responsible for orienteering, and o-runner who is looking forward to the night relay for Kristiansands OK

Team wear

Individual design

An individual design expresses the identity of both you and your club.

We ensure that your idea and design can be produced without limiting the quality and property of the fabric. You decide the design, colour and pattern, and we will make them. Our creative design team will help your club to a more defined branding.

Why look like everyone else when you can be unique?

High quality

Our product developers are continuously developing our functional products, technical solutions and high quality. We cooperate with elite runners, clubs and national teams, from where we get ideas and important knowledge of our products.

Our orienteering clothes are tested and adapted for training and competitions under normal and extreme conditions. The fabrics are of European and Scandinavian origin.

Long experience

Today's products are a result of over 30 years' experience within the textile industry. We have employees with this experience and athletes on a national and international level - these have given us great knowledge within production and development of training wear.

Cooperation with active athletes and their positive feedback has given us inspiration to continue to strive to further develop our clothing. This, combined with competent suppliers and modern production technology, enables us to deliver the best products, season after season.

Supplement guarantee

You keep the club design as long as you wish, the supplement guarantee has no expiry date. However, with the continuous development of new technology, our products improve.

The supplement guarantee takes care of the profile and strengthens the club's trademark year after year.

The details count

When choosing a supplier for your orienteering clothes, it is important to know and understand your possibilities. We have extensive experience in producing clothes in special designs for conditional sports, and we have developed a concept that fits large and small customers.

Design possibilities

Together with our design department, we are able to offer a wide range of designs to match your club profile. We can change and adapt according to your wishes and descriptions.

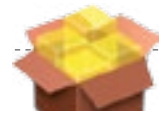

There are also a number of possibilities amongst our standard designs. We are here to help you - this is part of our service and is of course, free of charge.

Printing technology

All orienteering shirts are developed with laser technology. Pants and other products that are not laser printed, have colours that are co-ordinated to match these laser colours. This means that the fabrics keep their functionality, fit and quality whatever the design and sponsor print.

Laser technology makes it possible to create complicated designs with true colour.

Order volume

We offer specially produced club clothing in as low a quantity as five (5) pieces per product.

Our prices are volume-based, which means that the more you order, the lower the price.

Delivery

When the collection has been decided, it normally takes 6-8 weeks to produce your order.

Colours

In the summer of 2009, Trimtex has launched a new colour system that matches all the fabrics. So when you, as a customer, choose e.g. blue for your main colour scheme, then the same blue colour will be in all the products you order.

We have 15 different colours as a basis, but in some products, we are able to offer more colours.

Models

Our more popular products such as the Extreme o-shirt, are developed as female and unisex models. This is to ensure that you, as an orienteerer, have an o-shirt with a better fit, functionality and thus, greater training pleasure.

Collections & Samples

We are happy to send you samples for you to try and feel the quality of our products. Sizes range from 120 cm to XXXL. Shirts are available in female and unisex models.

We are also able to offer special lengths of +/- 5 / 10 cm in sleeves and legs - ask your sales rep for details.

Fabrics

All our fabrics are from European or Scandinavian suppliers. We guarantee that these fabrics are made especially for orienteering conditions, making your training sessions / competitions comfortable whatever the weather.

Peter Öberg

Make YOUR team

visible!

Trimtex is best on team wear. Compose your own clubwear with your own colours, design and profile. It will strengthen your image.

Laser technology

In the past years, Trimtex have taken use of digital laser printing in production of technical sportswear. There are several reasons for this: It opens up an almost unlimited number of design possibilities when creating the club's / company's profile. One

avoids excess dyeing and print falling off after use. In addition, the function of the item is improved due to near seamless products ensuring high comfort and freedom of movement when physically active.

Laser technology - Process

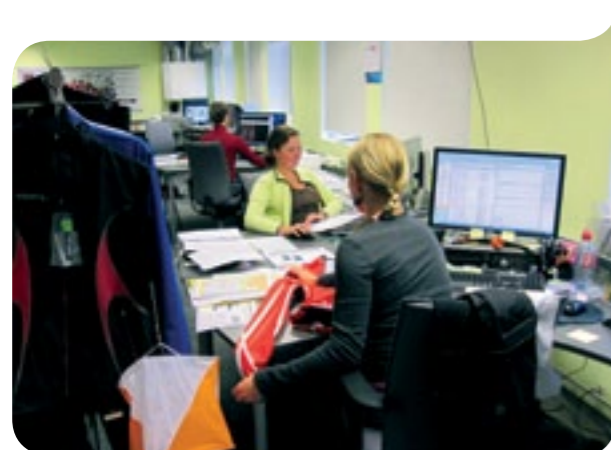

Our creative design team work hard to realize our customer's ideas and wishes. They will help you with everything from the basic design proposal to adjustments to quality assurance of the design.

Our technologists will then transfer the design on to pattern files and make the final adjustments to fit the finished product.

The pattern files are then printed out on widescreen plotters and checked before they are sent to the printing department.

This is a demanding process which requires great control and accuracy throughout. This is the reason Trimtex has established a daughter company in Estonia. There are over 25 highly qualified personnel ensuring that our customers receive high quality products - time after time.

By taking responsibility for the whole process - from idea to finished product - we guarantee that you receive the best and most functional products possible.

In the printing department paper and fabric are put together in a large hot press. When this process is finished, the paper is removed, and the design and colours have been transferred to the fabric. Another quality control is then carried out and sewing can begin.

European production

All production is carried out in Estonia by highly qualified partners. As production is so close to Europe, we are able to control logistics and be able to deliver in as little as 4 weeks from the order confirmation.

As all Trimtex personnel are in the same building, we are able to ensure full quality control and a good cooperation between the production in Estonia and the staff in Scandinavia.

European fabric

Almost all of our fabrics and accessories come from well-known European textile manufacturers. Only 5% of our purchases are done outside the EU.

European suppliers make it possible to work closely and continuously in developing fabrics, quality and technology.

Production development

All products are developed in our Product Development department (R&D) in Norway. This department comprises of highly qualified staff with a technical textile background and who work closely with the constructors in Estonia. Their main focus is on development and technology.

LZR SERIES

The LZR series comprises of technical products with laser design. This means that the laser design can be printed in the fabric without affecting the quality, function and fit of the product.

The LZR products have been developed in cooperation with world-class athletes within their area of expertise. The design on these technical training products can be transferred to other products - this means that the design and colour combinations can be kept throughout despite needs and athletic area. The fabrics in the LZR products come solely from Europe, mainly Sweden, Switzerland and Italy.

The products in the LZR series are for competition, training and active athletics, focusing on quality, fit and comfort, technical solutions and last, but not least, functionality.

TRX SERIES

TRX Series is a line of technical products with high quality, high functionality and perfect fit.

The TRX products have been developed in cooperation with world-class athletes within their area of expertise. The design on these technical training products can be transferred to other products - this means that the design and colour combinations can be kept throughout despite needs and athletic area. The fabrics in the TRX products come solely from Europe, mainly Sweden, Switzerland and Italy.

The products in the TRX series are for competition, training and active athletics, focusing on quality, fit and comfort, technical solutions and last, but not least, functionality.

SPEED LZR O-SHIRT SS

Article code	E50-L/SS
Area of use	Orienteering, competition and training, high level
Product description	A further development of the most sought after orienteering shirt on the market: Extreme o-shirt. This highly technical orienteering shirt has been developed in cooperation with Thierry Gueorgiou, David Andersson and Peter Öberg. Developed by the best for the best! The body shape and combination of fabrics make this an all-round orienteering shirt. Short zipper in front.
Choice	Laser design
Fabric	Absorb Coolmax Eyelet, Absorb Hydro and O-polyester Mesh
Sizes	130 - XXXL

SPEED LZR WOMENS O-SHIRT SS

Article code	E51-L/SS
Area of use	Orienteering, competition and training, high level
Product description	A further development of the most sought after orienteering shirt on the market: Extreme o-shirt. This a highly technical orienteering shirt has been developed together with Thierry Gueorgiou, David Andersson and Peter Öberg. Developed by the best for the best! The body shape and combination of fabrics make this an all-round orienteering shirt. Short zipper in front.
Choice	Laser design
Fabric	Absorb Coolmax Eyelet, Absorb Hydro and O-polyester Mesh
Sizes	XS - XXXL

EXTREME LZR O-SHIRT SS

Article code	E18.3-L/SS
Area of use	Orienteering, competition and training, warm weather, high level
Product description	The most sought after orienteering shirt on the market. This is an airy, technical o-shirt. The best combination of fabrics ensures a great fit and moisture transportation. This is the ultimate orienteering shirt with great wear resistance, low weight and good ventilation. Short zipper in front.
Choice	Laser design. Short or long sleeves.
Fabric	Absorb Coolmax Eyelet, O-polyester, O-polyester mesh
Sizes	130 - XXXL

EXTREME LZR WOMENS O-SHIRT SS

Article code	E19.3-L/SS
Area of use	Orienteering, competition and training, warm weather, high level
Product description	The most popular orienteering shirt on the market. This is an airy, technical female shaped o-shirt. An optimum combination of fabrics ensures a very good fit and moisture transportation. This is the complete o-shirt with great wear resistance, low weight and good ventilation. Short zipper in front.
Choice	Laser design
Fabric	Absorb Coolmax Eyelet, O-polyester and O-polyester mesh
Sizes	XS - XXXL

EXTREME TRX SHORT O-PANTS

Article code	E25
Area of use	Orienteering, competition and training, warm weather, high level
Product description	The most popular orienteering pants on the market. This is a tight-fitting, technical o-pants. An best combination of fabrics ensures a very good fit and comfort. The utmost pair of orienteering pants with great wear resistance, low weight and good ventilation. They are fitted at the knees and have a zipped pocket in the back.
Choice	Design
Fabric	Absorb Coolmax Eyelet, O-polyester, O-polyester mesh
Sizes	130 - XXXL

EXTREME LZR SHORT O-PANTS

Article code	E25-L
Area of use	Orienteering, competition and training, warm weather, high level
Product description	The most popular orienteering pants on the market now with laserdesign. This is a tight-fitting, technical o-pants. An best combination of fabrics ensures a very good fit and comfort. The utmost pair of orienteering pants with great wear resistance, low weight and good ventilation. They are fitted at the knees and have a zipped pocket in the back.
Choice	Laserdesign
Fabric	Absorb Coolmax Eyelet, O-polyester, O-polyester mesh
Sizes	130 - XXXL

EXTREME LZR O-GAITERS

Article code	E31.1-L
Area of use	Orienteering, competition and training, all weather, all levels
Product description	Comfortable and tight-fitting o-gaiters/leg shins for extra protection. They are made in Light Microfiber in front and elastic Lycra Mesh in the back for the utmost fit and freedom of movement. The o-gaiters have extra support in front. Anti-glide elastic ensures that the o-gaiters sit perfectly on the leg.
Choice	Laserdesign
Fabric	Light Microfiber, Newport Lycra
Sizes	XS - XL

EXTREME O-SOCKS

Article code	Orienteering, competition and training, all weather, all levels
Area of use	A comfortable and tight-fitted pair of orienteering socks for extra protection. They are made in a wear resistant and elastic material ensuring the best possible fit.
Product description	
Choice	Colors
Fabric	Polyester
Sizes	34-36, 36-40, 41-45

BASIC TRX O-GAITERS

Article code	E31
Area of use	Orienteering, competition and training, all weather, all levels
Product description	Comfortable and tight-fitting o-gaiters/leg shins for extra protection. They are made in Ultra Microfiber in front and elastic Lycra in the back for the utmost fit and freedom of movement. The o-gaiters have extra support in front with adjustable clettostars in back. Anti-glide elastic ensures that the o-gaiters sit perfectly on the leg.
Choice	Colors
Fabric	Ultra Microfiber, Newport Lycra
Sizes	XS - XL

BASIC LZR O-SHIRT SS

Article code	E13.1-L/SS
Area of use	Orienteering, competition and training, warm weather, all levels
Product description	A comfortable orienteering shirt with great wear resistance, ventilation and low weight. The shirt is fitted and feels light and comfortable to the body. Also available in mesh for a lighter, more airy quality.
Choice	Laser design. 0-polyester or 0-polyester mesh.
Fabric	0-polyester or 0-polyester mesh
Sizes	130 - XXXL

BASIC LZR O-SHIRT LS

Article code	E13.1-L/LS
Area of use	Orienteering, competition and training, cooler weather, all levels
Product description	A comfortable orienteering shirt with great wear resistance, ventilation and low weight. The shirt is fitted and feels light and comfortable to the body. Also available with mesh for a lighter, more airy quality.
Choice	Laser design. 0-polyester or 0-polyester mesh.
Fabric	0-polyester or 0-polyester mesh
Sizes	130 - XXXL

BASIC TRX LONG O-PANTS

Article code	E20.1
Area of use	Orienteering, competition and training, warm weather, all levels
Product description	A comfortable pair of orienteering pants with great wear resistance, ventilation and low weight. Fitted knee gives full freedom of movement. The pants feel light and comfortable to the body.
Choice	Design
Fabric	0-polyester
Sizes	130 - XXXL

BASIC TRX SHORT O-PANTS

Article code	E21.1
Area of use	Orienteering, competition and training, warm weather, all levels
Product description	A comfortable pair of orienteering pants with great wear resistance, ventilation and low weight. Fitted knee gives full freedom of movement. The pants feel light and comfortable to the body.
Choice	Design
Fabric	0-polyester
Sizes	130 - XXXL

RUN TRX LONG TIGHTS

Article code	B39
Area of use	Orienteering, competition and training, cooler weather, all levels
Product description	A comfortable and tight-fitting orienteering tights. Elastic Lycra and flatlock seams ensure full freedom of movement and a high level of comfort.
Choice	Back pocket
Fabric	Newport Lycra
Sizes	130 - XXXL

RUN TRX 3/4 TIGHTS

Article code	B34
Area of use	Orienteering, competition and training, warm weather, all levels
Product description	A comfortable and tight-fitting orienteering tights. Elastic Lycra and flatlock ensures full freedom of movement and a high level of comfort.
Choice	Design and back pocket.
Fabric	Newport Lycra
Sizes	130 - XXXL

ADVANCE LZR JACKET

Article code	A24-L
Area of use	Running, competition, training and warming up, high level
Product description	A technical tight-fitting training jacket with laser design. It is made in a wind and water repellent fabric that protects well against cooling down. Elastic inserts under the sleeves and ventilation in the back as well as an optimum combination of fabric ensures a good fit and full freedom of movement. Reflex zippers ensure safe training in the dark.
Choice	Laser design
Fabric	Light microfiber, Newport Lycra, Light mesh
Sizes	130 - XXXL

ADVANCE TRX JACKET

Article code	A19.1
Area of use	Running, competition and training, high level
Product description	A technical tight-fitting training jacket. Made in a wind and water repellent fabric, that ensures against cooling down. Breathable fabric under sleeves and ventilation in back. Elastic inserts and optimum combination of fabric ensures a good fit and full freedom of movement. Reflex zippers ensure safe training in the dark.
Choice	Design, Microfiber fabric
Fabric	Light Microfiber/Ultra Microfiber, Newport Lycra, Aquator, Light Mesh
Sizes	130 - XXXL

ADVANCE TRX 3/4 TIGHTS

Article code	B34
Area of use	Running, competition and training, high level
Product description	A technical tight-fitting 3/4 tights for training. Made in functional Aquator fabric, ensuring superior transportation of moisture, and an optimum running experience. Flatlock seams for max comfort. Zipped pocket in back. Reflex zippers ensure safe training in the dark.
Choice	Design
Fabric	Aquator
Sizes	130 - XXXL

ADVANCE LZR VEST

Article code	A27-L
Area of use	Running, competition, training and warming up, high level
Product description	A technical tight-fitting training vest with laser design. It is made in a wind and water repellent fabric that protects well against cooling down. Elastic inserts under the sleeves and ventilation in the back as well as an optimum combination of fabric ensures a good fit and full freedom of movement. Reflex zippers ensure safe training in the dark.
Choice	Laser design
Fabric	Light microfiber, Newport Lycra, Light mesh
Sizes	130 - XXXL

ADVANCE LZR PANTS

Article code	A36-L
Area of use	Running, competition, training and warming up, high level
Product description	A technical tight-fitting pair of training pants with laser design. It is made in a wind and water repellent fabric in the front that protects well against cooling down. Breathable fabric in the back ensures good ventilation. The elastic fabric in the back and fitted knees ensure a good fit and full freedom of movement. Reflex details ensure safe training in the dark.
Choice	Laser design
Fabric	Light microfiber, Newport Lycra, Light mesh
Sizes	130 - XXXL

ADVANCE TRX LONG TIGHTS

Article code	B36
Area of use	Running, competition and training, high level
Product description	A technical tight-fitting long tights for training. Made in functional Aquator fabric, ensuring superior transportation of moisture, and an optimum running experience. Flatlock seams for max comfort. Zipped pocket in back. Reflex zippers ensure safe training in the dark.
Choice	Design
Fabric	Aquator
Sizes	130 - XXXL

ADVANCE TRX WINTER TIGHTS

Article code	B46
Area of use	Running, skiing, competition and training, high level
Product description	A technical tight-fitting tights for winter training. It is made in Bi-elastic which has a brushed inside and has good insulation qualities. Elastic fabric and flatlock seams ensure high comfort and full freedom of movement. Zipped pocket in the back. Reflex zippers ensure safe training in the dark.
Choice	Laser design
Fabric	Bi-elastic
Sizes	130 - XXXL

TRAINER TRX JACKET

Article code	A16.2
Area of use	Running, skiing, competition, training and warming up, all levels
Product description	A technical figured training jacket. Made in a wind and water repellent fabric, that ensures against cooling down. Breathable fabric under sleeves and ventilation in back. Elastic inserts and optimum combination of fabric ensures a good fit and full freedom of movement. Reflex zippers ensure safe training in the dark.
Choice	Design. Microfiber material.
Fabric	Light Microfiber / Ultra Microfiber, Newport Lycra, Aquator, Light mesh
Sizes	130 - XXXL

MOTION TRX JACKET

Article code	A60 / A61
Area of use	All sports, competition and training, all levels
Product description	An allround training / track suit jacket. Made in a wind and water repellent fabric, that ensures against cooling down. Ventilation in back. The jacket has a normal fit developed for allround activities. Reflex zippers ensure safe training in the dark.
Choice	Design. Microfiber material.
Fabric	Light Microfiber / Ultra Microfiber, Active mesh
Sizes	120 - XXXL

TRAINER TRX VEST

Article code	A26.2
Area of use	Running, skiing, competition, training and warming up, all levels
Product description	A technical fitted training vest. Made in a wind and water repellent fabric, that ensures against cooling down. Breathable fabric under sleeves and ventilation in back. Elastic inserts and optimum combination of fabric ensures a good fit and full freedom of movement. Reflex zippers ensure safe training in the dark.
Choice	Design. Microfiber material.
Fabric	Light Microfiber / Ultra Microfiber, Newport Lycra, Aquator, Light mesh
Sizes	130 - XXXL

TRAINER TRX PANTS

Article code	A35.1
Area of use	Running, skiing, competition, training and warming up, all levels
Product description	A technical fitted pair of training pants. Made in a wind and water repellent fabric, ensures against cooling down. Breathable fabric in the back ensures good ventilation. Elastic fabric in the back and fitted knee ensure a good fit and full freedom of movement. Reflex details for safe training in the dark.
Choice	Design. Microfiber material.
Fabric	Light Microfiber / Ultra Microfiber, Newport Lycra, Light mesh / Active mesh
Sizes	130 - XXXL

MOTION TRX VEST

Article code	A66 / A67
Area of use	All sports, training, all levels
Product description	An allround vest. Made in a wind and water repellent fabric, that ensures against cooling down. Ventilation in back. The vest has a wide fit developed for allround activities. Reflex zippers ensure safe training in the dark.
Choice	Design. Microfiber material.
Fabric	Light Microfiber / Ultra Microfiber, Active mesh
Sizes	120 - XXXL

MOTION TRX PANTS

Article code	A65
Area of use	All sports, training, all levels
Product description	An allround pair of tracksuit pants. Made in a wind and water repellent fabric, that ensures against cooling down. The pants have a modern fit and fitted knees giving you full freedom of movement.
Choice	Design. Microfiber material.
Fabric	Light Microfiber / Ultra Microfiber, Active mesh
Sizes	120 - XXXL

BI-ELASTIC ZIPP LZR JACKET

Article code	C53-L
Area of use	All sports, training and warming up, all levels
Product description	A tight-fitting, flexible fleece with good technical qualities. It is made in Bi-elastic fabric with a 4-way stretch that ensures full freedom of movement and optimum fit. The brushed inside makes it comfortable and perfect for use during milder weather. Zipped pocket in chest.
Choice	Laser design
Fabric	Bi-elastic
Sizes	130 - XXXL

BI-ELASTIC ZIPP LZR WOMEN'S JACKET

Article code	C57-L
Area of use	All sports, training and warming up, all levels
Product description	A tight-fitting, flexible fleece with good technical qualities. It is made in Bi-elastic fabric with a 4-way stretch that ensures full freedom of movement and optimum fit. The brushed inside makes it comfortable and perfect for use during milder weather. Zipped pocket in chest.
Choice	Laser design
Fabric	Bi-elastic
Sizes	XS - XXXL

Put your club on your head!

Last season, we launched the Bi-elastic LZR cap. This became a huge success with more than 10 000 caps sold in six months! The fact that you can choose the design and look of your cap is unique. We can, of course, help you with the design proposals

at no extra cost. We'll add the club name and any sponsor logos you may have at no extra cost. The best thing with the cap is, after all, function and fit. "It's the best cap I've ever had" is one of the immediate comments from customers.

Heidi Bagstevold

Heidi Bagstevold is one of the greatest talents in Norwegian orienteering. After having come in at No. 9 in the Junior World Championships in Australia in 2007, she has two top world placements in NOM 2009.

For the 2010 season, she has changed clubs in order to pursue her career towards her main goal: The World Cup in Trondheim in August. What is it that drives her and where is her goal."

Facts

Name	Heidi Østlid Bagstevold
Born	10.07.1987
Home	Ås, Norway
Amount of training	465 hours in 2009
Club	Bækkelaget SK
Former club	Kongsberg OL
Trainer	Øystein Kristiansen
Work / Studies	Studying at Ås University to become a civil engineer in chemistry and biotechnology.

Merits

2009

- ✓ No. 8 in NOM long distance
- ✓ No. 8 in NOM middle distance (WC)
- ✓ No. 2 in NM long distance

2008

- ✓ No. 3 in NM middle distance
- ✓ No. 10 in NM long distance
- ✓ No. 9 in NM sprint

Heidi Bagstevold

If you hadn't been an orienteer, which sport would you have liked to do?

I played football until I was 17, so perhaps it would have been that.

What advice would you give to young Norwegian talents?

Have faith in yourself, and train a lot of technique. When the orienteering technique is in place, the speed will come.

What drives you to get out of bed every morning and go training?

It's the thought of becoming a better orienteer and obtaining better results at important competitions - and in order to do that, I must train.

Favourite terrain?

I am very fond of the wilderness. At home in Kongsberg, my favourite terrain is Bjørndalsetra - a cross between woods and mountains, beautiful scenery and demanding orienteering.

How have you become such a good night orienteer?

When the technique is right, I run well. Since my strength is in technique, it often goes well.

What do you think when you're at the starting line?

I focus on the job at hand, positive thoughts and that "I can do this, this I'm good at".

If you could only win one competition this year, which would it be?

As an orienteer, my dream is to win the World Cup at some time, so the answer is VM middle distance in Trondheim.

Do you have any special training philosophy?

My philosophy is to train diversely, listen to my body; "better with a day of rest too many, than several days of illness or injury" and to determine much of the training myself.

What do you think of the different distances in orienteering?

I am a real all-rounder and like all distances well.

What do you think is important in terms of orienteering clothes?

Clothes that itch, rub against the skin, are too big or small, or feel too hot or cold can ruin a good training session. Functionality and a good fit are, therefore, important!

What is your favourite Trimtex product?

The Softshell Air jacket.

Materials

The human body is built in such a way that it works best at the right temperature when active. It is therefore paramount that garments and fabrics are designed to help the body regulate its temperature independent of weather conditions.

Based on this, Trimtex have chosen fabrics with particular properties and developed combinations of fabrics that improve performance.

All the materials in our orienteering garments are produced in Europe and developed by well known European suppliers.

Absorb

10725 ABSORB COOLMAX EYELET

Absorb Coolmax Eyelet is a medium thick, all-round, structured quality. The fabric has been bioactively treated, resulting in good perspiration transportation and less odor. This fabric is perfect for training during high intensity. Absorb Coolmax Eyelet dries quickly and has breathable qualities.

Area of use: Speed LZR O-Shirt, Extreme LZR O-Shirt, Extreme LZR O-Pants, Extreme TRX O-Pants.

538301 ABSORB HYDRO

Absorb Hydro is a lightweight and comfortable quality developed for high intensity training. The fabric has a structured surface with good perspiration transportation. Absorb Hydro dries quickly and has breathable qualities.

Area of use: Speed LZR O-Shirt.

455 O-POLYESTER

O-polyester is a quality with immense wear resistance, low weight and high ventilation qualities. With its wear resistance, it is well suited for running in all kinds of terrain.

Area of use: Orienteering products in the Speed, Extreme and Basic series.

688 O-POLYESTER MESH

O-polyester mesh is a quality with high wear resistance, low weight and high ventilation qualities. The mesh structure makes the fabric more breathable and is specially suited for training and competitions in warmer conditions. With its wear resistance, it is well suited for running in all kinds of terrain.

Area of use: Orienteering products in the Speed, Extreme and Basic series.

Protect

8202 ULTRA MICROFIBER

Ultra Microfiber is a wind and water resistant fabric with good breathing properties. Ultra Microfiber is especially developed for training during high intensity and for use in colder weather conditions.

Area of use: Jackets, pants and vests.

4208 LIGHT MICROFIBER

Light Microfiber is a wind and water resistant fabric with good breathing properties. Light Microfiber is especially developed for training during high intensity, and for use in warmer weather conditions.

Area of use: Jackets, pants and vests.

Stretch

612 NEWPORT LYCRA

Newport Lycra is a very strong, elastic and breathable quality. It has a specially developed texture that makes it comfortable, stable and yet flexible.

Area of use: Run TRX Tights, elastic panels in jackets, pants and vests.

403 REVOLUTIONAL SHIRO

Revolutional Shiro is a wear resistant, stable and breathable lycra quality. This quality has structure that makes it very resistant to abrasion. This is a quick drying elastic material with high breathable qualities.

Area of use: Run LZR Tights.

63806 MESH LYCRA

Mesh Lycra is an elastic and very breathable mesh material. The material is comfortable and has good moisture transport qualities.

Area of use: Elastic panels in pants.

09594 AQUATOR

Aquator is a breathing and superelastic fabric which ensures maximum flexibility. A brushed and breathing surface that feels soft and comfortable to the skin.

Area of use: Advance TRX Tights, elastic panels in jackets.

450 / 452 BI-ELASTIC

Bi-Elastic is an elastic fabric with heat protective properties. A brushed and breathing surface that feels soft and comfortable to the skin.

Area of use: Advance LZR Winter Tights, Advance TRX Winter Tights, Trainer Plus Jackets, Pants and Vests.

Insulate

09645 INSULATE FLEECE

Fleece lining is a fleece material suitable for warming up and in cold weather. The quality feels comfortable, as well as having high insulation properties.

Area of use: Fleece-lined jackets, pants and vests.

TM082 LIGHT MESH

Light Mesh lining is a very light and airy quality with good ventilation properties.

Area of use: Unlined jackets, pants and vests.
